Pathology Update: State-of-the-Art Surgical Pathology

Back by popular demand, Pathology Update is holding its second event in 2023 in Nashville, TN this November! Connect with world class faculty and your peers to discuss the latest developments in surgical pathology. This course will review the topics below and offers 36 CME credits.

Breast Pathology
- Diagnostic features and common pitfalls of:
  » Non-invasive and invasive epithelial tumors
  » Fibroepithelial lesions
  » Inflammatory lesions
- Fine needle aspiration specimens:
  » Cytomorphologic features and reporting
  » Case-based illustrations with surgical excision specimens

Gastrointestinal Pathology
- Upper and lower GI pathology
  » Covering eosinophilic esophagitis, autoimmune atrophic gastritis, Celiac disease, and inflammatory bowel disease with sample sign outs provided
  » Non-neoplastic liver
  » When to use “Chronic Hepatitis,” and when to avoid the term
- Infectious diseases in GI

Genitourinary Pathology
- Eosinophilic renal tumors
  » Utilizing a limited immunohistochemical panel to confidently distinguish entities, with a focus on renal mass biopsies
- Key pathologic features included in a pathology report of urothelial carcinoma
  » Histologic subtypes
  » Pathologic staging of non-muscle invasive carcinomas

Gynecologic Pathology
- Endometrial carcinomas:
  » Classification, grading and staging
  » Reporting based on the recommendations of the International Society of Gynecological Pathologists
- Common uterine mesenchymal neoplasms:
  » Morphologic, immunohistochemical and molecular hallmarks
  » Practical algorithmic approach in the differential diagnosis and diagnostic workup

Head and Neck Pathology
- Diagnostic criteria for lesions of the thyroid gland, salivary glands, sinonasal cavity, and mucosal linings of the upper aerodigestive tract
- Recurrent and actionable molecular alterations in head and neck neoplasms

Immunohistochemistry
- Unknown tumor types
  » Applying judicious panel of immunohistochemistry (IHC) stains
- Metastatic carcinoma of unknown primary
  » Identifying site of origin with directed panel of transcription-factor-centric immunostains
- Best practices and potential pitfalls in IHC stain interpretation

Lung Pathology
- Mesothelial proliferations: benign vs. malignant
- Lung cancer diagnosis: current issues
- Matching lung biopsy types to lung problems

Molecular Pathology
- Molecular testing
  » Relevancy and the meaning of test results
  » Influence on the diagnosis, disease surveillance, and therapeutic choices
  » Current guidelines for various tumor types
- Molecular alterations
  » Lung and colorectal cancer
  » Soft tissue tumors

Neuropathology
- Classifying and grading tumors of the central nervous system using the updated 2021 World Health Organization classification system
- Performing an “integrated diagnosis”
- Using smears to interpret frozen sections

Join ASCP at the 2023 Pathology Update for a complete state-of-the-art overview of surgical pathology!

The value of Pathology Update comes directly from the expertise of the presenters and the real-world insights that they provide for your day-to-day practice.

This hands-on learning experience features a wide array of engaging courses designed to provide clinical applications in a dynamic and interactive setting. For example, you’ll learn through interactive cases, whole slide imaging, small group discussions, and more.

Pathology Update will take you beyond the H&E to provide the latest knowledge about staging and tumor classification, prognostic factors, immunohistochemical profiles and molecular markers, important clinical trials, and novel therapeutic approaches.

Nashville Course Schedule

Learn from a blend of engaging experts who will discuss a wide range of topics in pathology in addition to molecular and immunohistochemistry concepts and applications.

**Tuesday, November 7**

**LUNG PATHOLOGY**
8:00AM-12:00PM
Humberto Trejo Bittar, MD, FASCP
Moffitt Cancer Center

**NEUROPATHOLOGY**
1:30PM-5:30PM
Giselle López, MD, PhD, FASCP
Duke University School of Medicine

**Wednesday, November 8**

**BREAST PATHOLOGY**
8:00AM-12:00PM
Gulisa Turashvili, MD, PhD, FASCP
Emory University School of Medicine

**GYNECOLOGIC PATHOLOGY**
1:30PM-5:30PM
Kristzina Hanley, MD, FASCP
Emory University School of Medicine

**Thursday, November 9**

**HEAD AND NECK PATHOLOGY**
8:00AM-12:00PM
Nicole Cipriani, MD, FASCP
University of Chicago

**IMMUNOHistoCHEMISTRY**
1:30PM-5:30PM
Andrew M Bellizzi, MD, FASCP
University of Iowa Hospitals and Clinics

**Friday, November 10**

**MOLECULAR PATHOLOGY**
8:00AM-12:00PM
Marjorie David, MD, FASCP
University of Texas Health Science Center

**GASTROINTESTINAL PATHOLOGY**
1:30PM-5:30PM
Meredith Pittman, MD, FASCP
Maimonides Medical Center

**Saturday, November 11**

**GENITOURINARY PATHOLOGY**
8:00AM-12:00PM
Sara Wobker, MD, MPH, FASCP
UNC School of Medicine

---

**Course Director**

Krisztina Hanley, MD, FASCP
Emory University School of Medicine

---

**Members Save**

Price for Members
$346

Price for Residents/Fellows-In-Training
$574

Price for Non-Members
$1149
