Join us in Chicago this May for ASCP's new live education course on Genitourinary Pathology!

This course focuses on navigating current challenges pathologists encounter in genitourinary pathology, utilizing a case-based, interactive learning approach and exploring various best practices, protocols, and diagnostic approaches.

YOU WILL LEARN NEW SKILLS AND WALK AWAY WITH THE ABILITY TO IDENTIFY AND DIAGNOSE:

- Prostate histopathology: nuanced grading and reporting controversies
- Renal tumor classification: what really matters in a milieu of numerous entities and “proto”-entities
- Urothelial neoplasia: challenges with low-grade and high-grade flat lesions and simulants
- Testicular germ cell tumors: getting to benign or malignant, and from malignant to treatment categories

Faculty Highlights:

Sean R. Williamson, MD, FASCP
Director of Genitourinary Pathology and Vice Chair of Education, Cleveland Clinic

Steven C. Smith, MD, PhD, FASCP
Associate Professor of Pathology and Director of Pathology Residency Training Program, Virginia Commonwealth University

THURSDAY, MAY 16

8am-8:30am  Introductions/Icebreaker
8:30am-10:30am  Renal Tumor Classification: What Really Matters in a Milieu of Numerous Entities and “Proto”-entities
10:30am-10:45am  BREAK
10:45am-12:00pm  Adrenal Cortical Pathology: Updated Classification and Workup
12:00pm-1:00pm  LUNCH
1:00pm-2:45pm  Urothelial Neoplasia: Challenges with Low-Grade and High-Grade Flat Lesions and Simulants
2:45pm-3:00pm  BREAK
3:00pm-4:45pm  Testicular Germ Cell Tumors: Getting to Benign or Malignant and from Malignant to Treatment Categories
4:45pm-5pm  Wrap-Up/Q&A

FRIDAY, MAY 17

8:00am-10:00am  Prostate Histopathology: Nuanced Grading and Reporting Controversies
10:00am-10:15am  BREAK
10:15am-11:45am  GU Molecular Tumor Board: Integrating Surgical Pathology and Molecular Pathology for challenges in Bladder, Prostate, Kidney, and Testis
11:45am-noon  Wrap-Up/Q&A
